
DESKTOP APPLICATION PROGRAMMING

Overview

Certain types of accounting processes require that each record in the file be processed. Desktop Application Programming focuses on these procedural style processing systems. This event tests the programmer's skill in designing a useful, efficient, and effective program in the area described below.

This is a two-part event: a program is submitted by the second Friday in May to the national center to be judged and all eligible individuals will present the program at the NLC in a preliminary round.

This is an individual event.
