About this Guide

Radnor Township School District has developed this guide to support teachers who are new to, or continuing on with, a district iPad initiative. Its primary focus is to provide faculty with fundamental resources for embedding iPads into curriculum to support teaching and learning.

This site walks teachers through setting up a district iPad and introduces users to the core apps that are installed on all district iPads through printable documentation and how-to videos. There are links to all initiative forms as well as the App Request Form that is available to faculty who are part of district initiatives.

Requesting Apps
If you are part of a district iPad initiative, you can submit a request for a single copy of an app to evaluate for classroom use. If approved, the app will get pushed to you wirelessly within a few days. Complete the form below to do this.
